

To Whom it May Concern.I am asking you to reject the NAB's petition 04-160. I use satllite radio on a regular basis. As part of my work I travel extensively and am often out of range of radio transmissions of any kind. Satelitte radio has been of tremedous value to me especvially in remote locations. In addition upon returning into urban areas I can quickly learn of traffic hazards and avoid them. This saves me time and gas as well as reduces congestion. Please consider my comments.

Sincerely

John Duffy
